**LUDWIG—**  
“On every album back liner the producers try to find the right way of letting you know what good music is inside. On this album, my first of many successes, I have decided to give the boys a chance. After all, they’re my fellow musicians and should know.”

“I was so excited with Ludwig’s playing that I quit my cheese business to go on the road with him.”

“I’m a very nice person and so is Ludwig. He was nice to ask me to talk about the music. It’s nice.”

“Therefore, conservatorily speaking, and due to the current influx of ideas, theories, etc., etc., into various musical idioms of this musical generation, or, for that matter, any musical generation, predominantly made up of such tonalities, variations, forms, structures, etc., etc., etc., it is easy to say.”

“Are you serious?”
