Contained within this album jacket is some of the best material from the unlimited resource of original by-products of the absurdly intelligent minds of the O.E.W.B.E.M.B.B. Kinko the Clown is like the boy next door (sort of), Daddy's Money is satire at its best, and not to mention Dead Puppies - the all-time sing along classic. Laff and cry, moan and groan; you're really, really going to like this album, really really...
