Parakeet Training Record

The first words and phrases are the most difficult for parakeets to learn. With this record, however, your parakeet will break that "first-word barrier" fast.

In an amazingly short time, your parakeet will actually teach himself to talk, simply through listening and imitating the words and phrases on this record.

The words have been carefully selected because they consist of sounds that parakeets find easy to duplicate.

These words are professionally presented in the most ideal manner—spoken slowly and distinctly by a voice with perfect diction.

They are repeated over and over, in the same tone of voice, at the proper pitch, at the exact rate that parakeets will most readily imitate.

Once your parakeet learns the words and phrases on this record, you should have no difficulty with his further train-

ing. He will quickly pick up other words and rapidly develop a large vocabulary.

EASY TO USE: Just play the record on your phonograph and let your bird perch near the speaker. Stay with your pet for the first lesson or two until it becomes accustomed to the new source of sound. Then, let your bird listen on his own, away from other birds, other pets or distractions. Use repeat mechanism if your phonograph is so equipped. By giving your bird a "lesson" several times each day, you will soon be rewarded by hearing him repeat the words and phrases he has heard so often.

HEALTHY, HAPPY PARAKEETS LEARN TO TALK FASTER, BETTER— You will get better results from this training record if you make sure your parakeet is in the best of condition—healthy, happy and contented. Just follow these suggestions from Hartz Mountain's parakeet experts. You'll gain more pleasure from your pet.

NOTE: This record also lets you hear how a parakeet should sound, so you will know what you can expect from your bird.

MAKE SURE OF PROPER DIET—A correct diet is essential to parakeet health. Hartz Mountain's famous "Balanced Diet" for parakeets supplies this, providing the right kinds of seed in the right proportions for best nourishment. Feed the Hartz Mountain Diet as follows:

- *In the seed cup each day*
—Hartz Mountain Parakeet Seed

- *In the treat cup each day*
—Hartz Mountain Parakeet Treat one day, and Hartz Mountain Parakeet Condition Food the next—alternating day to day.

FOR BRIGHTER, MORE COLORFUL FEATHERS
Make your parakeet more beautiful, by bringing out the bright color in its feathers. The "natural" way to do this is with HARTZ MOUNTAIN PARAKEET COLOR-TONE. This is a choice mixture of fruit, vegetable and flower seeds, specially chosen for their ability to enhance the brightness and color of parakeets.

REWARD YOUR BIRD WITH A SEED TREE
A Hartz Mountain Seed Tree gives your bird a touch of the outdoors. These naturally grown seed trees are choice stems of rich seeds—provided for your bird just as he would find them if he were flying wild. Use as a reward. Parakeets consider them a real delicacy.
