CAROUSEL RECORDS...Ask Any Child

Ask any child. Listening to Carousel Records is fun. The music sounds good. It makes them feel good inside. The voices they hear on these albums are sweet, pleasant, happy voices. The voices make them feel sweet and pleasant and happy.

The melodies are simple. The rhymes are catchy, the rhythms pleasing. That's why they like to play their Carousel records over and over. Notice with what rapt attention they listen. Carousel Records are their friends.

Grownups like Carousel Records too, because they know they make children so happy. Besides, they know that each Playtime Record is produced by talented artists, recorded on fine equipment, and created of excellent material which assures them of fidelity and durability even under the sometimes not-too-careful handling of their young owners.

The selections chosen are the favorites of children, produced with integrity and dependability. Ask any child.

H. WILBUR
